

Britons For A Clean Atmosphere

<https://britonsforacleanatmosphere.uk/>

GeoEngineering methods release hazardous emissions into our atmosphere including unnatural electromagnetic radiation pollution and other toxic agents like aluminium and sulphur dioxide, contributing to severe health problems that threaten people especially children, birds, bees, wildlife and all of nature.

Small groups of **financiers and scientists** are making **all important decisions** about the use and development of GeoEngineering and **global governance** in **international conferences and forums** without Public knowledge or consent.

Analytical Report from Derbyshire rainwater

Date & Time Taken: 17/08/22 01:00

Sample Name: PWDE44FS

Date Received: 19/08/22

Date Started: 19/08/22

Sample Point:
Collected From:

PARAMATER	RESULT	METHOD	SITE
* sulphur	0.51 mg/l = 510 ug/l	H169	HN
* lithium	<0.17 ug/l	HY-267	HN
* strontium	3.3 ug/l	HY-267	HN
aluminium	35 ug/l Al	HY276	HN
barium	9.1 ug/l Ba	HY276	HN

These chemicals should not be in our atmosphere

Please join our cause to oppose the polluting of our atmosphere!
