

HOW DO YOU LIKE YOUR WEATHER?

NATURAL

ARTIFICIAL

No one knows how many Geoengineering / weather 'research' projects have been authorised without public consent. Cumulative effects could have profound negative consequences on Earth and the air we breathe.

Britons for a Clean Atmosphere

We are a small group of international volunteers dedicated to raising public awareness and advocating for laws to prohibit atmospheric experiments known as "Solar Radiation Management / Modification" (SRM) or "Geoengineering."

Currently, the UK does not have any regulations in place to **BAN SRM** and other interventions that pollute our air and alter natural weather.

Please sign our open letter to BAN SRM here:
