

STOP OUTDOOR SRM EXPERIMENTS **NOW**

Solar Radiation Management (SRM) is unproven, high-risk and being advanced **without consent or true oversight.**

WHAT IS SRM?

SRM = Solar Radiation Management: deliberate attempts to reflect sunlight (e.g., stratospheric aerosols, marine cloud brightening) to cool the planet temporarily. **It does NOT reduce greenhouse gases.**

MAIN RISKS

Regional climate disruption (rainfall, monsoons OR DROUGHT), damage to crops and livelihoods.

Ozone and atmospheric chemistry harm.

Unequal, cross-border impacts; geopolitical harm.

No clear legal remedy or compensation for harmed communities.

WHY THIS MUST STOP

NO CONSENT: Communities beneath test areas have not given free, prior and informed consent. **CONSULTATION IS NOT CONSENT.** Assuming public acceptance is a rights violation.

NO TRANSPARENCY: Funding, contracts, trial plans, locations and impact studies are often hidden behind secrecy or confidentiality clauses.

NO INDEPENDENT OVERSIGHT:

Current arrangements lack a statutory, conflict-free authority with power to stop unsafe experiments.

ARIA RISK: The Advanced Research & Invention Agency (ARIA) has unusually broad freedom and commercial confidentiality options that could enable high-risk atmospheric experiments with limited parliamentary scrutiny.

OUR DEMANDS — ACT NOW

Immediate statutory moratorium on all outdoor SRM experiments.

Full public disclosure of all SRM funding, contracts, trial proposals and impact assessments.

Creation by statute of an independent Geoengineering Oversight Authority with public interest membership and enforceable powers.

Mandatory Free, Prior and Informed Consent (FPIC) for affected communities.

Parliamentary scrutiny of ARIA funding tied to SRM and binding international coordination to prevent cross-border harm.

Legal remedies and liability rules for harm caused by unauthorised experiments.

ASK YOUR MP — THREE QUESTIONS TO DEMAND NOW

- 1 What legal authority permits any outdoor SRM test here? Please cite the statute.
- 2 Where are the independent environmental, health and social impact assessments? Publish them now.
- 3 Will the government commit to a moratorium until independent oversight and demonstrable local consent are in place?

WHAT YOU CAN DO TODAY

Send the three questions above to your MP/councillor.

Ask ARIA and universities for full disclosure of any SRM grants and confidentiality clauses.

Join/support groups calling for a moratorium and public hearings.

Demand public hearings and legal remedies for affected communities.
